CAREER OBJECTIVE

Passionate frontend developer skilled in React, Next.js, Tailwind CSS, and the MERN stack. Built real-world applications with dynamic dashboards, authentication, and responsive design. Always eager to learn new technologies, solve real-world problems, and work in a collaborative team.

TECHNICAL & SOFT SKILLS

Expertise: JavaScript, ES6, React.js, Firebase, Tailwind, Html5, Css5

Comfortable: Next.js, Rest API, Chrome Dev Tool

Familiar: Node.js, Express.js, MongoDB, JWT, Axios

Tools: Git & GitHub, npm, VS Code, Netlify, Vercel PROJECTS

Soft Skills: Team Management, Time Management, Team Lead, Communication

Projects

Tree-planting (May 2025- May 2025)

[Live](#) | [Client](#)

Developed a Tree-planting App that lets users discover various tree species by category, learn about their ecological benefits and environmental impact, and contribute to the platform by submitting new tree profiles with images and data.

- **User-Friendly Interface:** Designed with simplicity and clarity in mind, the app features intuitive navigation, clear visual hierarchy, and consistent design elements—making tree browsing and submission easy for users of all ages and tech skills.
- **Filtering:** Enabled users to refine tree searches by category, benefit , or region using intuitive controls like checkboxes, sliders, and dropdowns.
- **Dashboard:** The app has two roles: User, and Admin, each with unique features.

Virtual Bookshelf(June 2025- June 2025)

[Live](#) | [Client](#)

I built a full-stack Bookshelf app where users can add, edit, and explore books with features like real-time upvoting, review system, category filtering, and profile analytics — all secured with Firebase Auth. Technologies used: React, Express, MongoDB, Firebase.

- **User-Friendly Interface:** The application features with a clean, responsive layout, smooth animations, and intuitive navigation, making it easy for users to explore and manage books across devices.
- **Filtering:** Implemented real-time filtering by category and keyword, enabling users to easily find books based on interests or search terms through a responsive and dynamic interface.
- **Dashboard:** The app has two roles: User,, and Admin, each with unique features.

Job-tracker(April 2025- April 2025)

[Live](#) | [Client](#)

A responsive web application built with React that helps users track their job applications easily. Users can add, update, and delete job listings with custom statuses like Applied, Interviewing, Rejected, or Hired. Designed for simplicity and productivity to streamline the job hunting process.

- **User-Friendly Interface:** Designed a user-friendly interface with a clean dashboard, status indicators, responsive forms, and intuitive navigation to simplify job tracking and application management for users..
- **Dashboard:** The app has three roles: User, and Admin, each with unique features.
