CAREER OBJECTIVE

Motivated frontend developer with a solid foundation in React, JavaScript, Tailwind CSS, and the MERN stack. As a fresher, my goal is to build a sustainable career by continuously adding real value to my company through a proactive learning mindset. Eager to contribute to collaborative teams, solve real-world challenges, and grow alongside the organization.

TECHNICAL & SOFT SKILLS

Expertise: JavaScript, React.js, Firebase, Tailwind, Html5, Css5

Comfortable: Rest API, Chrome Dev Tool.

Familiar: Node.js, Express.js, MongoDB, JWT, Axios

Tools: Git & GitHub, npm, VS Code, Netlify, Vercel PROJECTS

Soft Skills: Time Management, Communication.

Projects

Tree-planting (May 2025- May 2025)

[Live](#) | [Client](#)

Developed a Tree-planting App that lets users discover various tree species by category, learn about their ecological benefits and environmental impact, and contribute to the platform by submitting new tree profiles with images and data.

Features:

- The application features a clean, responsive layout, smooth animations, and intuitive navigation, making it easy for users to explore trees across devices.
- The stacks that I used in this application are JavaScript, React.js, Tailwind css, Firebase for authentication and so on.

Virtual Bookshelf(June 2025- June 2025)

[Live](#) | [Client](#)

Built a full-stack Bookshelf app where users can add, edit, and explore books with features like real-time upvoting, review system, category filtering, and profile analytics.

Features:

- The application features a clean, responsive layout, smooth animations, and intuitive navigation, making it easy for users to manage their digital bookshelf, track reading progress, and discover popular books across devices.
- Built with modern technologies: React.js, Tailwind CSS, Framer Motion, Firebase Auth, Express.js, and MongoDB.

Job-tracker(April 2025- April 2025)

[Live](#) | [Client](#)

A responsive web application built with React that helps users track their job applications easily. Users can add, update, and delete job listings with custom statuses like Applied, Interviewing, Rejected, or Hired.

Features:

- This application offers mobile-optimized interface with smooth transitions and user-friendly navigation, empowering users to effortlessly organize job applications, monitor their progress, and stay on top of deadlines across all devices.
- Crafted with a modern tech stack: React.js, Tailwind CSS, Framer Motion, Firebase Authentication, Express.js, and MongoDB.
